

Blackboard Admin Portal

Manual Overview

Bb-Admin Portal Manual Overview

The Blackboard Admin Portal (Bb-Admin Portal) provides an online tool for Blackboard Coordinators to manage user account and course shell creation and modification. The new version of the Bb-Admin Portal provides expanded functionality with an easy to use interface that removes many of the cumbersome restrictions that existed with the previous version.

This manual is a reference guide for each of the administrative functions that can be performed in the Bb-Admin Portal. Please consult this manual prior to contacting The Blackboard Team for help with a specific function.
