

How do I Let Parents or Others who don't have Accounts see my Course?

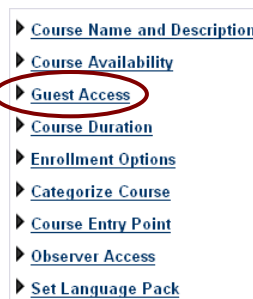

Guest access provides users without a login & password access to Blackboard course site resources that have been made available to them. Guests can be anyone from parents, to students, to complete strangers. Make sure when you choose to allow guest access to a resource in your course site that you don't mind anyone on the internet getting access to it.

1. While in your Blackboard Course, click  .

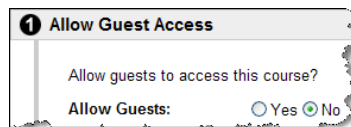

2. Click on the Settings link.

3. Click the Guest Access link.

4. Click the radio button that corresponds with your decision to either allow or deny access to guests.

5. Click  .

6. Click  .

TIP!

A good rule of thumb is to deny access to guests if you have anything in your course that shouldn't be accessed by the general public.

Blackboard is accessible on the internet and can be accessed by anyone who finds it. Since users who don't log in are guests, this means they'll have full access to your course.
